INSTALLATION INSTRUCTIONS

EASY TRIM
FENCEGUARD

For Support please contact us at: (587) 315-5712
E-Mail: sales@etfenceguard.com
BEFORE YOU START...

✓ You have all recommended tools on hand (Please see page 2 for list of recommended tools.)
✓ Inspect the chain link fence for any obstructions (dirt build up, grass build up, rocks, wood etc.)
✓ It is recommended that you install Easy Trim Fenceguard with 2 people

EASY TRIM FENCEGUARD

PARTS LIST

1. Easy Trim Fence Guard
2. Connector Clips
3. Attachment/Securing Springs
## PARTS DESCRIPTION

1. **Easy Trim Fence Guard**
   - 8 & 10 Foot Segments
   - Can be cut to any required size to fit your chain link fence
   - Includes evenly spaced holes at the bottom for water drainage and for placement of Attachment/Securing Springs.

2. **Connector Clips**
   - 1 Clip per segment of Easy Trim Fenceguard product.
   - Used to snap over any seam where an Easy Trim Fenceguard segment aligns with an adjacent Easy Trim Fenceguard segment.
   - To create a seamless guard, look and feel for your Easy Trim Fenceguard solution.

3. **Attachment/Securing Springs**
   - 3 - 4 Spring per segment of Easy Trim Fenceguard product.
   - Used to firmly attach and secure the Easy Trim Fenceguard product to your chain linked fence.

## RECOMMENDED TOOLS

- ✓ Tape Measure
- ✓ Heavy Duty Cutting Shears, Snips or Hacksaw
  - ✓ We do NOT recommend using power tools
- ✓ Standard Pliers/Needle Nose Pliers
- ✓ Garden shovel/Spade
INSTALLATION STEPS

Step 1
• Prepare area under fence.
  • One last tedious trim to create some clearance under the fence
  • You may have to use your garden shovel or spade to dig out any dirt, rock or debris build up

Step 2
• Measure Chain Link Fence for your Easy Trim Fenceguard Solution
  • Measure Segments from Post to Post
  • Depending on your fence configuration you may have to cut to fit

Step 3
• Slide one connector clip on either end of the segment.
  • This will be used later in the installation process to cover seams
• Placing one segment at a time
• Lay the prepared Easy Trim Fenceguard product flat on the ground in front of the segment of Chain link fence where it is required
• Starting from one end of this section of the chain linked fence, in one direction, start to slide the Easy Trim Fenceguard product under your chain linked fence, then begin to angle the Easy Trim Fenceguard product up to a vertical position, placing the bottom of chain linked fence into the cavity of the Easy Trim Fenceguard product.
• Continue to insert the bottom of the chain linked fence into the cavity of the Easy Trim Fenceguard product.
**INSTALLATION STEPS**

**Step 4**
- Please repeat Step 3 for all required segments

**Step 5**
- Install the Easy Trim Fenceguard Attachment/Secure Springs through the bottom holes on the Fenceguard product to the chain-link fence.
  - This will keep your Easy Trim Fenceguard product tightened securely to your fence.

**Step 6**
- Now that all segments of Easy Trim Fenceguard are “loosely fit” slide each connector clip over the seams

**NOTE:** Please allow an inch to a half-inch gap between the Fenceguard segments, which will be covered by the connector clips, to allow for potential expansion during changes in temperature from extreme heat to cool.

**Now wait for your grass to grow so you can make all of your neighbors envious of your new clean fence line!**
